

EMPLOYMENT OF STUDENTS

The Board of Education endorses the employment of students for work in the school when there are funds available, when such work will not interfere with the student's academic progress and when the work that needs to be done is considered to be within the ability of the students. Such employment shall not be more than half-time on days when school is in session. The Board and administration will cooperate with government agencies which provide funds for the employment of youth.

Note: Prior policy, Policy Manual (Employment of Students, JK)
